Uniss a settlement between the boss es and building trades is soon effected failure must follow to some of these firms.

The condition is the result of the strike, through its several steps of development, of the Housesmiths against the Irgu League.

About a month ago, when the housesmiths were all but defeated, their purpose being to unionize the shops of cornell Bros. and the Jackson Architectural iron Works Company, the Board of Walking Delegates stepped in and took charge of the fight for the Union. Since then it has spread until all but two of the building trades are involved and building construction is completely paralyzed.

To-day it seems as if the difficulty had resolved itself into a battle between the Building belegates. It was through sympathy with the Iron League and because the drivers refused to deliver material to jobs in which the Cornell Bros. and the Jackson Architectural Iron Works Company, the backbone and rinewor the Iron League, were interested, that the material dealers were induced to officially deciare their sympathy with the League side of the first move of the delegates after taking that region the first move of the delegates after taking that the first move of the delegates after taking that the could have no weight we whether or not they would be held for trial for manslaughter.
